

Additional Christmas Lights

1. Purpose of Report

To provide requested information to the Council with regard to additional lighting on lampposts along Lower High Street to Town Bridge & from the Market Cross to the Triangle

2. Background

- i. Two years ago the Christmas Lighting Scheme in Malmesbury was enhanced to include strung, icicle lights across the Upper High Street, the Market Cross and motif lights on lampposts within that area.
- ii. It was agreed at the last TH&F that the Clerk would find out how many more lampposts there are between the Town Bridge and the Triangle and will get a quote for them to be decorated.
- iii. The Groundsmen met with the suppliers and concluded that there are 19 suitable lampposts for decoration

3. Financial Implications & Risks

- i. To provide an electricity supply to each of the 19 lampposts it would be £4,085.00
- ii. To decorate each of the 19 lampposts it would be a further £1,805.00

4. Proposal

The Committee decides whether it wishes to provide electricity supplies to additional lampposts & decorate

Claire Mann
Acting Town Clerk
