### **Government Proposals to Support Parish Councils**

Robert Jenrick MP (Secretary of State for Housing, Communities, and Local Government) wrote to all Councils on the 30.4.20 stating the Government has made 3.2 billion funds available to Councils in relation to Covid 19. The latest funding tranche was 1.6 billion included a larger share for lower tier councils. No notification from Wiltshire Council has been received either directly or indirectly to us of any possible funding contribution that may come from this funding stream. This matter has been raised with Wiltshire Council via WALC, and via various individual representations. The Wiltshire Council position as of the 12.5.20 is that they are not in a position to comment on this matter.

Wiltshire Councils contextual position to support this stance is that they are currently working to reconcile their own budget challenges; and based on a 3-6 month projection their adopted business modelling suggests they are potentially facing a 47-80 million deficit. They hold a reserve in the region of 15million, and pre Covid 19 had a funding gap of 24.5 million for 2021/22.
